

NiK Software Plugins Workshop

One Day Image Optimization and Image Conversion Workshop

Nik Software's plug-ins for Adobe Photoshop, Lightroom and Apple's Aperture are one of the most innovative tool sets designed to fit within your image editing workflow to enhance and optimize your images. The ease of use combined with processing algorithms and the award-winning U Point® technology makes these plug-ins ideal for high quality retouching, color correction, and unlimited creative possibilities for your images.

The workshop covers the six plug-ins as a image editing workflow. We start with Define and progress through Viveza and Color Efex Pro and finalize the image with Sharpener Pro. As a part of the workflow we will cover Silver Efex Pro as the ultimate tool for monochrome conversions and HDR Pro. Differences in using the plugings with Lightroom and Photoshop will be covered in detail. We will not cover the plug-ins for Aperture.

You will learn how to get the most out of your workflow, optimizing raw images in Lightroom, various noise reduction methods, making global versus targeted adjustments, the techniques to optimum sharpening for screen and for print.

Separate non workflow based segments will cover HDR and Monochrome images creation using HDR Efx Pro and Silver Efx Pro.

This workshop is designed for all levels of photographers.

You should bring your lap-top computer installed with Photoshop, Lightroom preferably both. 30 Day trial versions are available from Adobe. Please ensure you have installed the NiK software plug-ins. These are also available as trial versions for a limited time.

Adobe and NiK products may be purchased from my web site www.shivverms.com/discounts
Use the discount code sverma to avail of a 15% discount for all Nik Software.

Please bring images that you would like to work on. Images that have visible noise, portraits and scenics. Bring one or two images that you would like to convert to monochrome and bring 3 or more exposure bracketed sets to create an HDR image.
